

SAP GST SOLUTION FOR WHOLESALE DISTRIBUTION / TRADING INDUSTRY - ON PREMISE HARDWARE

SAP solutions help wholesale distributors evolve faster, be more efficient, and offer new services. With deeper insight and effective execution, companies can provide relevant customer engagement while tapping into a diverse, extended workforce. Wholesale distribution software from SAP connects value chain processes by integrating horizontal lines of business with industry solutions on premise, in the cloud, and on mobile devices. This enables digital transformation using innovations such as the Internet of Things and Big Data.

SAP solutions help companies achieve customer, operations, and finance excellence through:

- Best use of workforce resources, resulting in high customer loyalty, sales, and service efficiency.
- Better processes for supplier collaboration, procurement, supply chain, and trading.

GST STARTER PACK – ON- PREMISE HARDWARE

CROSS INDUSTRY

The proposed Goods & Services Tax (GST), recently cleared for implementation in 2017 will be positive for the Indian Cross Industry. Benefits from improved transparency and ease of doing business would also improve supply chain efficiency over the longer term. The modus operandi of implementation of GST could have a short-term impact on the cash flow cycle pertaining to payment of indirect taxes; under the GST system, updation / reconciliation and payment by the seller on the GST network system would be required before the buyer can avail input-tax credit, effectively elongating the working capital cycle related to indirect tax payments.
